

If you are having trouble getting video files to submit via the Google Form for All-State Auditions, I would recommend the following:

1. Try a different browser. Especially if you are using anything other than Google's Chrome browser. Chrome is the best option in terms of browsers.
2. Try from a different device, especially if you are attempting to upload from a mobile device. PCs/laptops seem to work best.
3. If your school uses Google for their email, you may need to log out of your school account and use a personal Gmail account instead. Some school Gmail accounts won't allow file uploads.
4. If you are uploading at work, your school's firewall may prevent you from doing so. Try uploading from home
5. Some directors who have a lot of uploads have found that splitting them up into smaller "batches" can help (i.e. if you need to upload for 15 students, submit the form in 3 groups of 5 to cut down on how much data is being submitted at one time).
